Release 2021.4.1
What's new ?

Fast&4You

SAP® Partner
Open Ecosystem
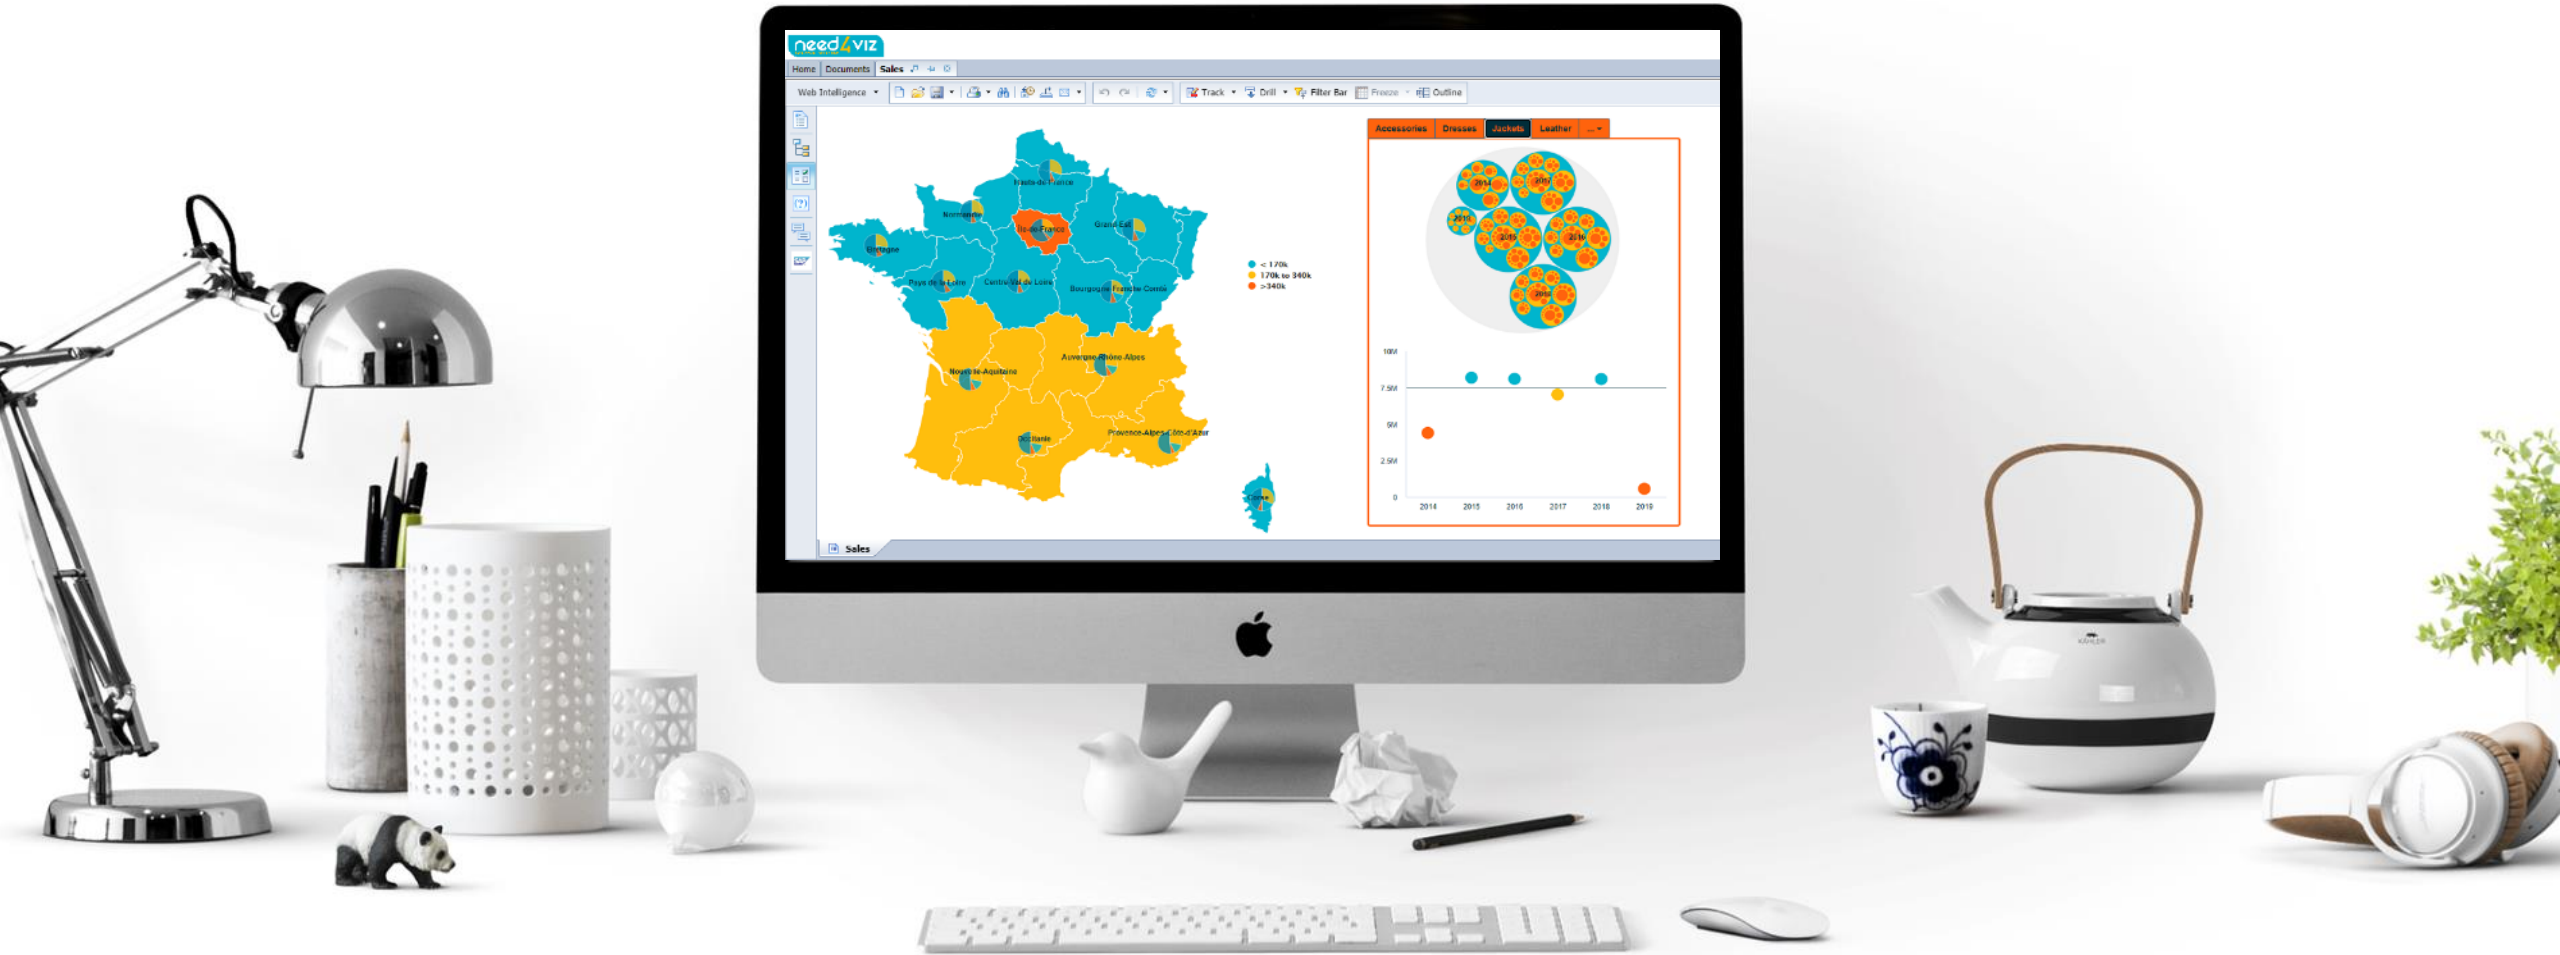

Find here some main **new features** of this release…

The full release note is available **HERE**

Many general improvements have been made in this release...
Architecture enhancement, custom palettes, new features and more efficiency in existing charts, a new release with share of surprises !

The enterprise colour palette : You wanted it, we did it!

Define on server side your own custom palettes (corporate graphic standards...) and use them **in all Need4Viz components in all your Webi reports**.

Create, name, organize the whole palettes as you want...

In each component, choose the Webi palette or one of your custom palette.

Palette colors

Choose your palette colors | Webi palette ▾

✓ Webi palette
Need4Viz palette 01
Need4Viz palette 02
Need4Viz palette 03
Need4Viz palette 04

Now use up to 5 dimensions in the Circle Packing.

Drill deeply in your data to explore them entirely.

Now Need4Viz for Webi is available on Windows and Linux

DATA VISUAL SOLUTIONS

The Multi Chart has been deeply enhanced in this release : multi Y-Axes, custom menu and new shapes…

Multi Y-Axis
For each measure, a specific Y-Axis can now be used. Combined to all other features already in this component, this makes the Multi one of the most powerful Need4Viz chart
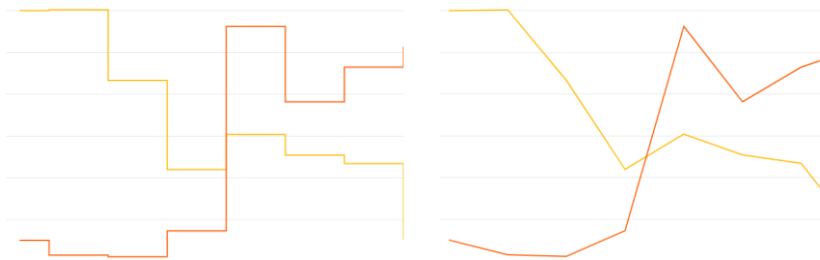

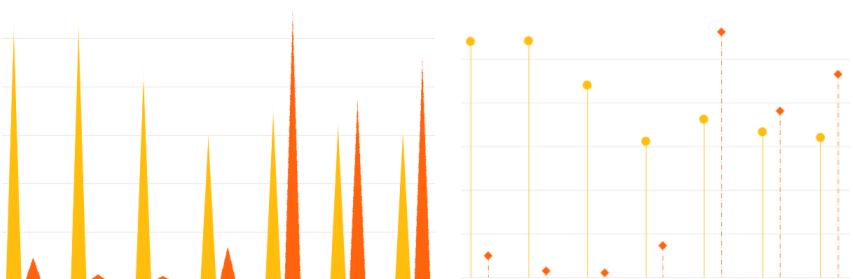

Click to choose a new chart

Turn into Menu
The "turn into" menu can now be entirely customized. You can set each chart you want to display in the menu

New shape for columns & bars
Change traditional columns and bars rectangle to Pyramid or Lollipop shape
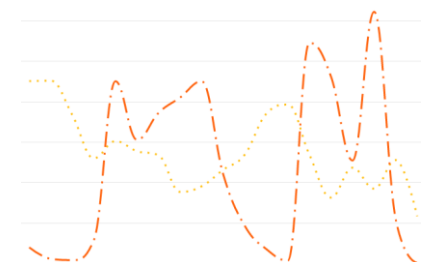

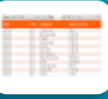

New styled lines & outlines
For each measure, the width and style of the line/outline can be set with a combination of dot & dashes styles

New shape lines
For lines and areas, you can choose the shape of line (curve, broken line, steps)

Many improvements and new options have been added to the Table Filter.

New iconified Toolbar. Set colour background & gradient. Set the fonts of the items

Add up to 3 conditional formatting on each measure
Apply the format only on the concerned cell or on the entire line

Fix the width of each column (in pixels or in percentage)

Open the table as a Pop-up

Click on a KPI in a chart to open the detail lines in a Table Filter. The table is displayed in a popup appearing over the dashboard.

Click on the cross button to close the popup and back to the dashboard

Find here the N4V roadmap for Webi.
This forecast is likely to change depending on the needs and requests of our customers.
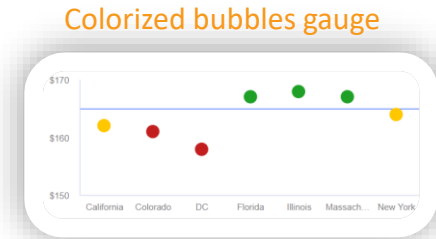

Month	01	02	03	04	05	06	07	08	09	10	11	12
2021
