

Release **2022.0.1**

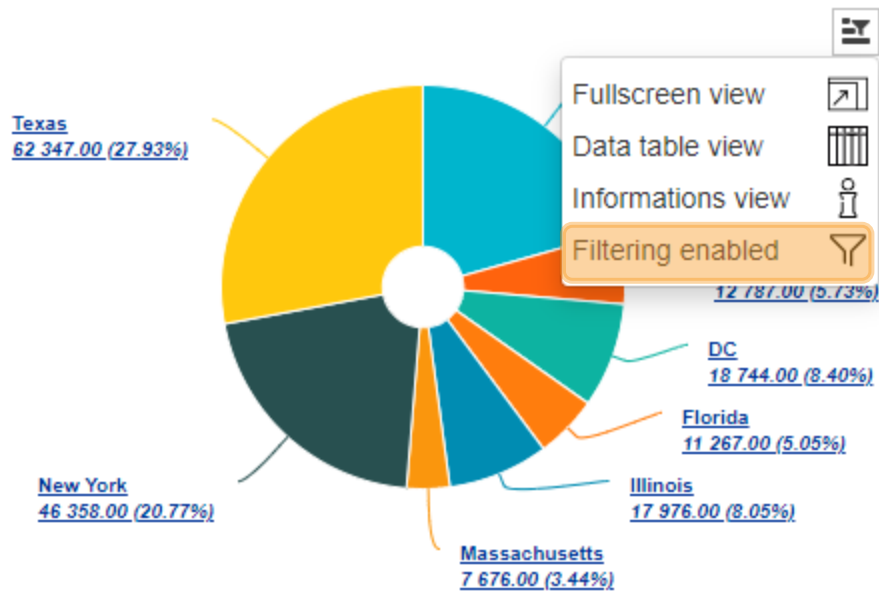

What's new ?

Fast**&**4You

Find here some main **new features** of this release...  
The full release note is available [HERE](#)

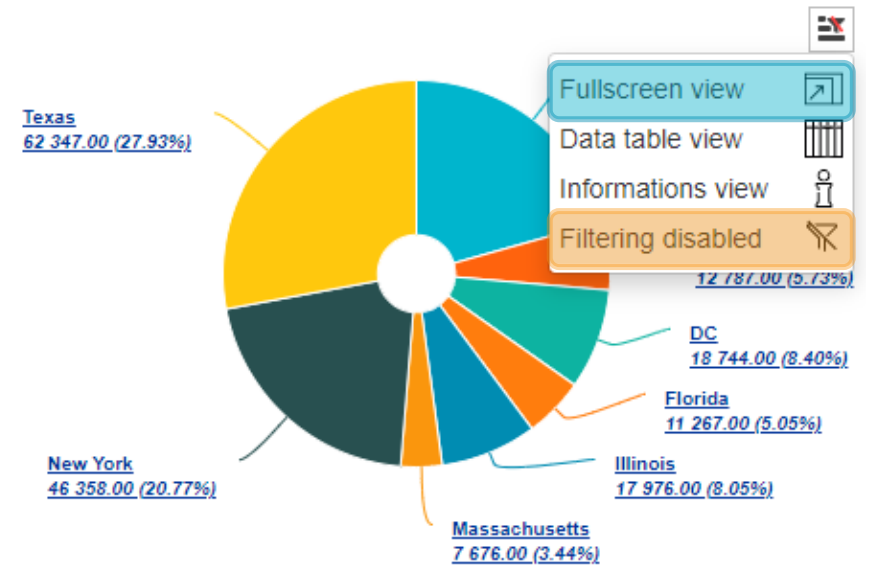

The N4V menu has been redesigned. New look and new features. All items now grouped under the main menu icon, new item to **enable/disable filtering during drill navigation...**

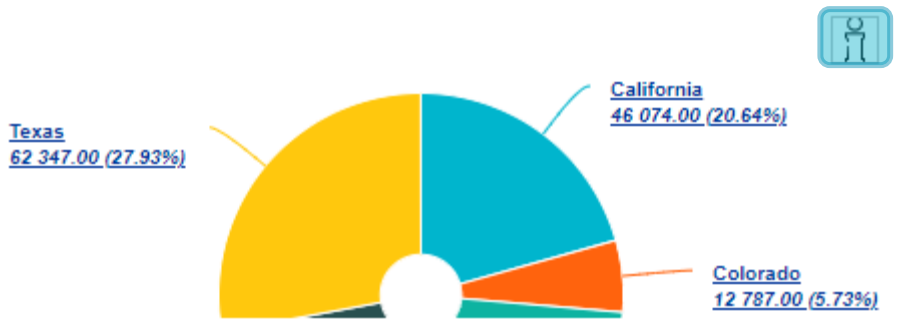

The new optional **filtering icon** enable/disable Webi linking filtering during drill

When **filtering is disabled**, the main icon remind it smartly

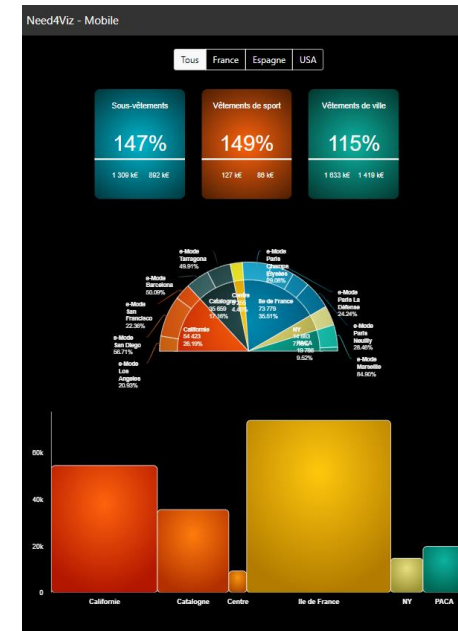

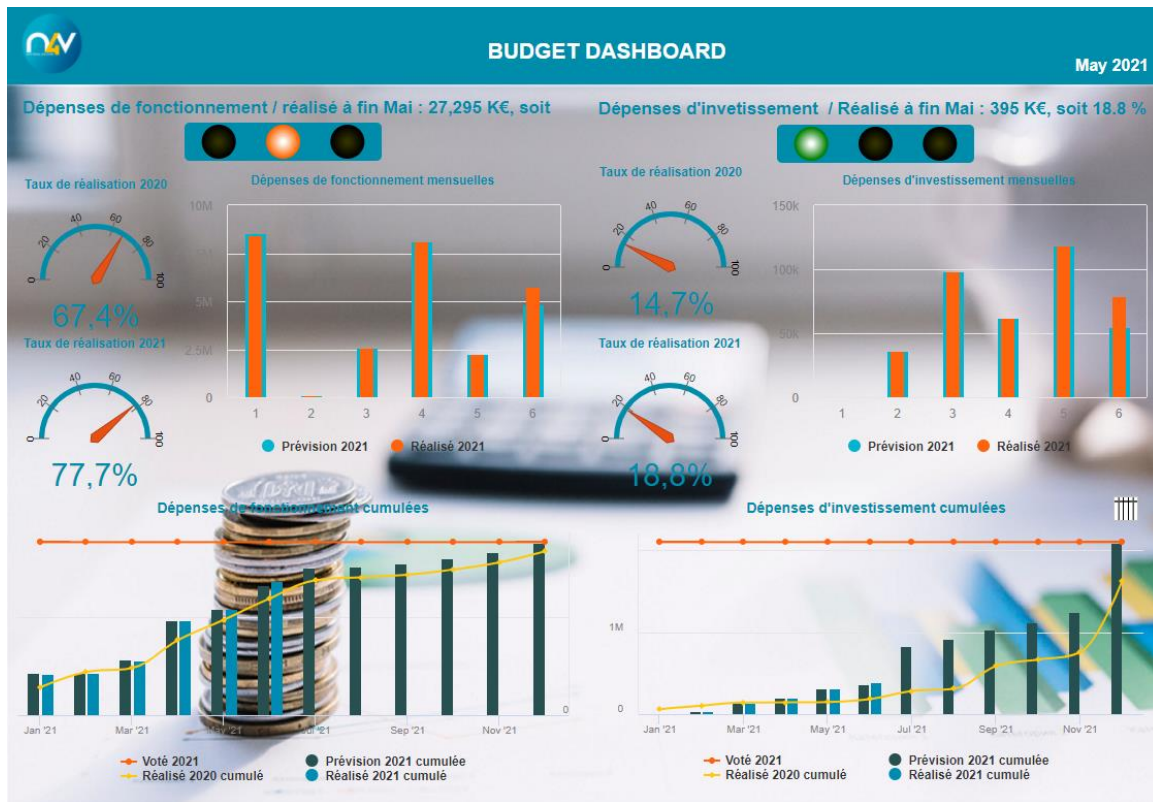

**Fullscreen** item is now placed with the other menu items

When only **one item** is displayed, it's **icon** is directly accessible

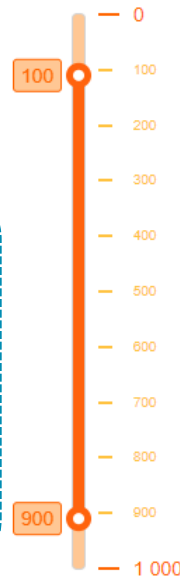

As usual, many enhancements have been given to the components. Someone of them : **background can now be transparent**, components are now **responsive** when exported as HTML, **new shapes for sliders**...

**Responsive** components for a better integration on Mobile devices

New shapes are available for **sliders** (simple & double). You can now reduce space used by sliders and give them a more modern style

**Transparent** background can be used in all components (charts & navigation). Overlay charts or use an image as background of your Webi report is now possible.

Find here the N4V for Webi roadmap for **2022**.  
This forecast is likely to change depending on the needs and requests of our customers.
