DATA VISUAL SOLUTIONS

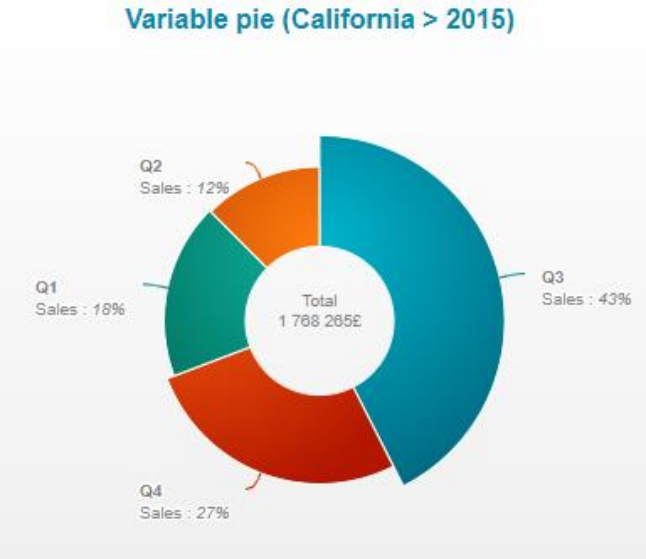
Find here some main **new features** of this release...

The full release note is available **HERE**

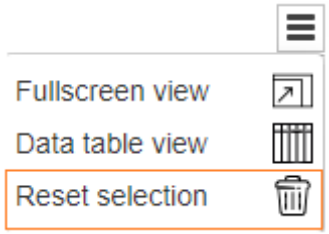
Store/Reset Selection

To complete the functionality of stored drill level, now in all N4V components, the selected item is highlighted and stored in the cache of the user's browser. It is highlighted again when filtering the report or coming back to the page.

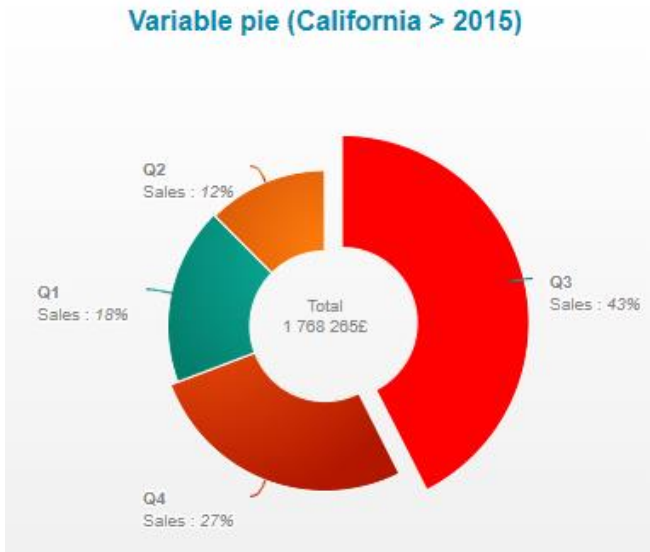


Select an item (to filter the report for example).
The selection is highlighted (red color can be changed)

Click again on selected item will unselect it (and reset Webi filter if applied)



A new item can be added to the N4V menu. You can reset the selection (and go-back to the top level in drill components)

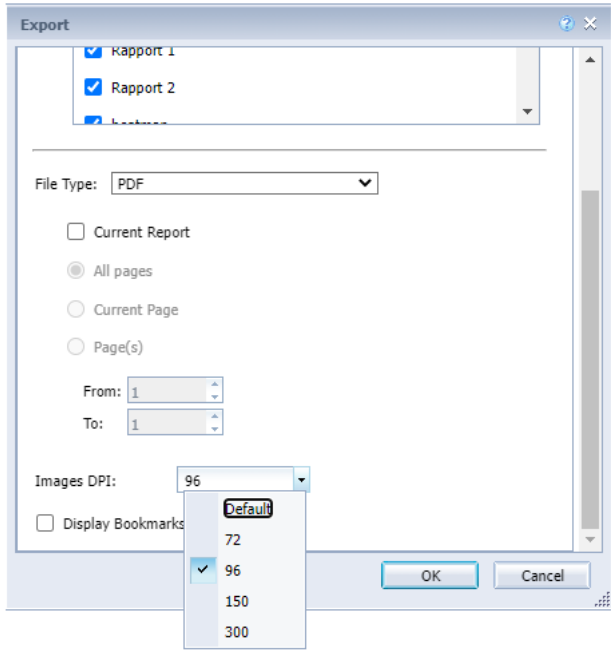


Highlighting selection can be disabled in each component

need4viz DATA VISUAL SOLUTIONS

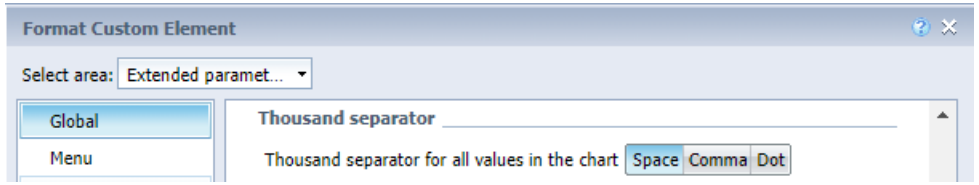
Global Enhancement

Many enhancement are coming with the new release : **Printing in PDF**, **HTML Export**, **Default number formatting**...

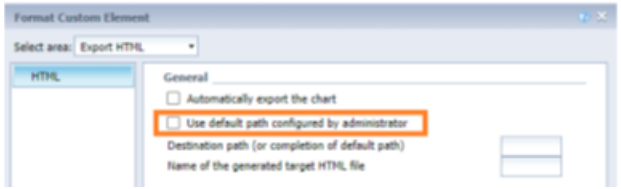


Previously, it was mandatory to select 96 DPI when exporting N4V components in PDF.

Now, you can choose the DPI you want ! The image generated in the PDF will always be correctly sized and in a higher definition



Thousand separator can now be set globally and initialized with your value for all components



A default path where exporting HTML components can be set by administrator.
In each component, check the box to use it (complete it if needed) or continue to set individually your destination path.
